## Schema

title: OpenC2 Language Objects

module: oasis-open.org/openc2/v1.0/openc2-lang

patch: wd08

description: Datatypes that define the content of OpenC2 commands and responses.

exports: OpenC2-Command, OpenC2-Response imports: slpf: oasis-open.org/openc2/v1.0/ap-slpf jadn: oasis-open.org/openc2/v1.0/jadn

## OpenC2-Command (Record)

ID	Name	Type	#	Description
1	action	Action	1	The task or activity to be performed (i.e., the 'verb').
2	target	Target	1	The object of the action. The action is performed on the target.
3	actuator	Actuator	01	The subject of the action. The actuator executes the action on the target.
4	args	Args	01	Additional information that applies to the command.
5	id	Command-ID	01	Identifier used to link responses to a command.

#### Action (Enumerated)

ID	Name	Description
1	scan	Systematic examination of some aspect of the entity or its environment in order to obtain information.
2	locate	Find an object physically, logically, functionally, or by organization.
3	query	Initiate a request for information.
6	deny	Prevent a certain event or action from completion, such as preventing a flow from reaching a destination or preventing access.
7	contain	Isolate a file, process, or entity so that it cannot modify or access assets or processes.
8	allow	Permit access to or execution of a target.
9	start	Initiate a process, application, system, or activity.
10	stop	Halt a system or end an activity.
11	restart	Stop then start a system or activity.
14	cancel	Invalidate a previously issued action.
15	set	Change a value, configuration, or state of a managed entity.
16	update	Instruct a component to retrieve, install, process, and operate in accordance with a software update, reconfiguration, or other update.
18	redirect	Change the flow of traffic to a destination other than its original destination.
19	create	Add a new entity of a known type (e.g., data, files, directories).
20	delete	Remove an entity (e.g., data, files, flows.
22	detonate	Execute and observe the behavior of a target (e.g., file, hyperlink) in an isolated environment.
23	restore	Return a system to a previously known state.
28	сору	Duplicate a file or data flow.
30	investigate	Task the recipient to aggregate and report information as it pertains to a security event or incident.
32	remediate	Task the recipient to eliminate a vulnerability or attack point.

## Target (Choice)

ID	Name	Type	#	Description
1	artifact	Artifact	1	An array of bytes representing a file-like object or a link to that object.
2	command	Command- ID	1	A reference to a previously issued OpenC2 command.
3	device	Device	1	The properties of a hardware device.
4	directory	Directory	1	The properties common to a file system directory.
7	domain_name	Domain- Name	1	A network domain name.
8	email_addr	Email-Addr	1	A single email address.
9	email_message	Email– Message	1	An instance of an email message, corresponding to the internet message format described in RFC 5322 and related RFCs.
10	file	Fi <b>l</b> e	1	Properties of a file.
11	ip_addr	IP-Addr	1	The representation of one or more IP addresses (either version 4 or version 6).
13	mac_addr	Mac-Addr	1	A single Media Access Control (MAC) address.
15	ip_connection	IP- Connection	1	A network connection that originates from a source and is addressed to a destination. Source and destination addresses may be either IPv4 or IPv6; both should be the same version.
16	openc2	OpenC2	1	A set of items used with the query action to determine an actuator's

17	process	Process	1	Common properties of an instance of a computer program as executed on an operating system.
25	property	Property	1	Data attribute associated with an actuator
18	software	Software	1	High-level properties associated with software, including software products.
19	uri	URI	1	A uniform resource identifier (URI).
23	windows_registry_key	Windows– Registry– Key	1	The properties of a Windows registry key.
1000	extension	PE-Target	1	Targets defined in a Private Enterprise extension profile
1024	slpf	slpf:Target	1	Targets defined in the Stateless Packet Filter profile.

#### Actuator (Choice)

ID	Name	Type	#	Description
1000	extension	PE-Specifiers	1	Specifiers defined in a Private Enterprise extension profile.
1024	slpf	slpf:Specifiers	1	Actuator specifiers and options as defined in the Stateless Packet Filter profile.

#### Args (Map)

ID 1 2	Name start_time stop_time	Type Date-Time Date-Time	# 01 01	Description The specific date/time to initiate the action The specific date/time to terminate the action
3	duration	Duration	01	The length of time for an action to be in effect
4	response_requested	Response- Type	01	The type of response required for the action: **none, ack, status, complete**. When not explicitly contained in an OpenC2 Command, a Consumer MUST responde the same as response type complete.
1000	extension	PE–Args	01	Command arguments defined in a Private Enterprise extension profile
1024	slpf	slpf:Args	01	Command arguments defined in the Stateless Packet Filter profile

#### OpenC2-Response (Record)

ID	Name	Type	#	Description
1	status	Status-Code	1	An integer status code
2	status_text	String	01	A free-form human-readable description of the response status
3	*	Results	01	Data or extended status information
4	id_ref	Command-ID	01	ID of the command that induced this response

#### Status-Code (Enumerated.ID)

ID	Description
----	-------------

- 102 Processing -- An interim response used to inform the client that the server has accepted the request but not yet completed it.
- 200 OK -- The request has succeeded.
- 301 Moved Permanently -- The target resource has been assigned a new permanent URI
- Bad Request The server cannot process the request due to something that is perceived to be a client error (e.g., malformed request syntax.)
- 401 Unauthorized The request lacks valid authentication credentials for the target resources or authorization has been refused for the submitted credentials.
- Forbidden -- The server understood the request but refuses to authorize it.

Description

- 500 Server Error -- The server encountered an unexpected condition that prevented it from fulfilling the request.
- Not Implemented -- The server does not support the functionality required to fulfill the request.

# PE-Target (Choice.ID)

טו	туре	#	Description
32473	32473:Target	1	Example Targets defined in the Example Inc. extension profile

#### PE-Specifiers (Choice.ID)

ID	туре	#	Description
32473	32473:Specifiers	1	Example Specifiers defined in the Example Inc. extension profile

#### PE-Args (Map.ID)

ID Type # Description

## PE-Results (Map.ID)

ID Type # Description

32473 32473:Results 1 Example -- Results defined in the Example Inc. extension profile

## Artifact (Record)

ID	Name	Type	#	Description
1	mime_type	String	01	Permitted values specified in the IANA Media Types registry
2	*	Payload	01	choice of literal content or URL to obtain content
3	hashes	Hashes	01	Specifies a dictionary of hashes for the contents of the payload

#### Device (Map)

ID	Name	Type	#	Description
1	hostname	Hostname	1	A hostname that can be used to connect to this device over a network
2	description	String	01	A human-readable description of the purpose, relevance, and/or properties of the device
3	device_id	String	01	An identifier that refers to this device within an inventory or management system

#### Domain-Name

Name	Type	Description
Domain-Name	String (hostname)	RFC 1034, section 3.5

#### Email-Addr

Name	Type	Description
Email-Addr	String (emai <b>l</b> )	Email address, RFC 5322, section 3.4.1

#### File (Map)

ID	Name	Type	#	Description
1	name	String	01	The name of the file as defined in the file system
2	path	String	01	The absolute path to the location of the file in the file system
3	hashes	Hashes	01	One or more cryptographic hash codes of the file contents

#### IP-Addr

Name	Type	Description
IP-Addr	String (ip)	IPv4 or IPv6 address per RFC 2673 section 3.2, and RFC 4291 section 2.2

## IP-Connection (Record)

ID	Name	Type	#	Description
1	src_addr	IP-Addr	01	source address
2	src_port	Port	01	source TCP/UDP port number
3	dst_addr	IP-Addr	01	destination address
4	dst_port	Port	01	destination TCP/UDP port number
5	protocol	L4-Protocol	01	Protocol (IPv4) / Next Header (IPv6)

## OpenC2

Name	Type	Description
OpenC2	ArrayOf(Query-Item) ['max', 'min']	A target used to query Actuator for its supported capabilities

## Process (Map)

ID	Name	Type	#	Description
1	pid	Integer	01	Process ID of the process
2	name	String	01	Name of the process

3 Current working directory of the process cwd String 0..1 4 executable File 0..1 Executable that was executed to start the process 5 0..1 Process Process that spawned this one parent 6 0..1 The full command line invocation used to start this process, including all arguments command\_line String Property (Record) ID Name Type # Description String 1 The name that uniquely identifies a property of an actuator. name A query string that identifies a single property of an actuator. The syntax of the query string is 2 query\_string String 1 defined in the actuator profile Command-ID Name Type Description Command-ID String Uniquely identifies a particular command Date-Time Name Type Description Milliseconds since 00:00:00 UTC, 1 January 1970. Date-Time Integer Duration Type Description Name Duration Integer Milliseconds Hashes (Map) ID Name # Description Type MD5 hash as defined in RFC3121 md5 0..1 **Binary** SHA1 hash as defined in RFC3174 4 sha1 Binary 0..1 0..1 SHA256 as defined in RFC6234 6 sha256 Binary Hostname Name Type Description A legal Internet host name as specified in RFC 1123 Hostname String Identifier Name Type Description Identifier command--UUIDv4 - An identifier universally and uniquely identifies an OpenC2 command. Value SHOULD be a String UUID generated according to RFC 4122. L4-Protocol (Enumerated) ID Name Description icmp Internet Control Message Protocol - RFC 792 1 6 Transmission Control Protocol - RFC 793 tcp 17 udp User Datagram Protocol - RFC 768 132 sctp Stream Control Transmission Protocol - RFC 4960 Payload (Choice) ID # Name Type Description payload\_bin Binary 1 Specifies the data contained in the artifact. 2 url URI MUST be a valid URL that resolves to the un-encoded content Port

Name Type Description
Port Integer (port) Transport Protocol Port Number, RFC 6335

#### Query-Item (Enumerated)

ID Name Description	ID	Name	Description
---------------------	----	------	-------------

1 versions OpenC2 language versions supported by this actuator

2 profiles List of profiles supported by this actuator

3 schema Definition of the command syntax supported by this actuator

4 pairs List of supported actions and applicable targets

## Response-Type (Enumerated)

ID	Name	Description
0	none	No response

1 ack Respond when command received

status Respond with progress toward command completion
 complete Respond when all aspects of command completed

#### URI

Name	Type	Description

URI String Uniform Resource Identifier

#### Version

Name	Type	Description
Version	String	TBSL

#### Results (Map)

ID	Name	Type	#	Description
1	strings	String	0n	Generic set of string values
2	ints	Integer	0n	Generic set of integer values
3	kvps	KVP	0n	Generic set of key:value pairs
4	versions	Version	0n	The list of OpenC2 language versions supported by this actuator
5	profiles	jadn:Uname	0n	The list of profiles supported by this actuator
6	schema	jadn:Schema	01	Syntax of the OpenC2 language elements supported by this actuator
7	pairs	ActionTargets	0n	List of targets applicable to each supported action
1000	extension	PE-Results	01	Response data defined in a Private Enterprise profile
1024	slpf	slpf:Results	01	Response data defined in the Stateless Packet Filter profile

#### KVP (Array)

ID	Type	#	Description
1	<b>I</b> dentifier	1	key name of this item
2	String	1	value string value of this item

## ActionTargets (Array)

ID	Type	#	Description
----	------	---	-------------

1 Action 1 action -- An action supported by this actuator 2 Target.\* 1..n targets -- List of targets applicable to this action
