Schema

title: OpenC2 Language Objects

module: oasis-open.org/openc2/v1.0/openc2-lang

patch: wd08-slpf_merged

description: OpenC2 Language content used by Stateless Packet Filters.

exports: OpenC2-Command, OpenC2-Response

Types

OpenC2-Command (Record)

| ID | Name | Туре | # | Description |
|----|----------|------------|----|----------------------------------------------------------------------------|
| 1 | action | Action | 1 | The task or activity to be performed (i.e., the 'verb'). |
| 2 | target | Target | 1 | The object of the action. The action is performed on the target. |
| 3 | actuator | Actuator | 01 | The subject of the action. The actuator executes the action on the target. |
| 4 | args | Args | 01 | Additional information that applies to the command. |
| 5 | id | Command-ID | 01 | Identifier used to link responses to a command. |

Action (Enumerated)

| ID | Name | Description |
|----|--------|-----------------------------------------------------------------------------------------------------------------|
| 3 | query | Initiate a request for information. Used to communicate supported options and determine state or settings. |
| 6 | deny | Prevent traffic or access. |
| 8 | allow | Permit traffic or access. |
| 16 | update | Instruct the actuator to update its configuration by retrieving and processing a configuration file and update. |
| 20 | delete | Remove a rule. |

Target (Choice)

| ID | Name | Type | Description |
|------|---------------|-------------------|---------------------------------------------------------------------------------------------------------------|
| 10 | file | File | Properties of a file |
| 11 | ip_addr | I P-Addr | The representation of one or more IP addresses (either version 4 or version 6) expressed using CIDER notation |
| 15 | ip_connection | IP- Connection | A network connection that originates from a source and is addressed to a destination |
| 16 | openc2 | OpenC2 | A set of items used with the query action to determine an actuator's capabilities |
| 1024 | slpf | slpf:Target | Targets defined in the Stateless Packet Filter profile |

Actuator (Choice)

| ID | Name | Туре | Description |
|------|------|-----------------|-----------------------------------------------------------------------------------------------------------|
| 1024 | slpf | slpf:Specifiers | Specifiers as defined in the Stateless Packet Filter profile, oasis-open.org/openc2/oc2ap-slpf/v1.0/csd01 |

Args (Map)

| ID | Name | Type | # | Description |
|------|--------------------|---------------|----|------------------------------------------------------------------|
| 1 | start_time | Date-Time | 01 | The specific date/time to initiate the action |
| 2 | stop_time | Date-Time | 01 | The specific date/time to terminate the action |
| 3 | duration | Duration | 01 | The length of time for an action to be in effect |
| 4 | response_requested | Response-Type | 01 | The type of response required for the action |
| 1024 | slpf | slpf:Args | 01 | Command arguments defined in the Stateless Packet Filter profile |

OpenC2-Response (Record)

| ID | Name | Type | # | Description |
|----|-------------|-------------|----|-------------------------------------------------------------------------------|
| 1 | status | Status-Code | 1 | An integer status code |
| 2 | status_text | String | 01 | A free-form human-readable description of the response status |
| 3 | * | Results | 01 | Data or extended status information that was requested from an OpenC2 command |
| 4 | id | Command-ID | 01 | ID of the response |
| 5 | id_ref | Command-ID | 01 | ID of the command that induced this response |
| 6 | actuator_id | String | 01 | ID of the actuator sending the response |

Status-Code (Enumerated.ID)

ID Description

- 102 Processing -- An interim response used to inform the client that the server has accepted the request but not yet completed it.
- 200 OK -- The request has succeeded.
- 301 Moved Permanently -- The target resource has been assigned a new permanent URI
- Bad Request The server cannot process the request due to something that is perceived to be a client error (e.g., malformed request syntax.)
- 401 Unauthorized -- The request lacks valid authentication credentials for the target resources or authorization has been refused for the submitted credentials.
- Forbidden -- The server understood the request but refuses to authorize it.
- 500 Server Error -- The server encountered an unexpected condition that prevented it from fulfilling the request.
- Not Implemented -- The server does not support the functionality required to fulfill the request.

File (Map)

| ID | Name | Type | # | Description |
|----|--------|--------|----|------------------------------------------------------------------|
| 1 | name | String | 01 | The name of the file as defined in the file system |
| 2 | path | String | 01 | The absolute path to the location of the file in the file system |
| 3 | hashes | Hashes | 01 | One or more cryptographic hash codes of the file contents |

IP-Addr

| Name | Type | Description |
|---------|-------------|-------------------------------------------------------------------------|
| IP-Addr | String (ip) | IPv4 or IPv6 address per RFC 2673 section 3.2, and RFC 4291 section 2.2 |

IP-Connection (Record)

| ID | Name | Type | # | Description |
|----|----------|-------------|----|--------------------------------------|
| 1 | src_addr | IP-Addr | 01 | source address |
| 2 | src_port | Port | 01 | source TCP/UDP port number |
| 3 | dst_addr | IP-Addr | 01 | destination address |
| 4 | dst_port | Port | 01 | destination TCP/UDP port number |
| 5 | protocol | L4-Protocol | 01 | Protocol (IPv4) / Next Header (IPv6) |

OpenC2

| Name | Type | Description |
|--------|------------------------------------|----------------------------------------------------------------|
| OpenC2 | ArrayOf(Query-Item) ['min', 'max'] | A target used to query Actuator for its supported capabilities |

Command-ID

| Name | Type | Description | |
|------------|--------|------------------------------------------|--|
| Command-ID | String | Uniquely identifies a particular command | |

Date-Time

| Name | Type | Description |
|-----------|---------|--------------------------------------------------|
| Date-Time | Integer | Milliseconds since 00:00:00 UTC, 1 January 1970. |

Duration

| Name | Type | Description |
|----------|---------|--------------|
| Duration | Integer | Milliseconds |

Hashes (Map)

| ID | Name | Type | # | Description |
|----|--------|--------|----|---------------------------------|
| 1 | md5 | Binary | 01 | MD5 hash as defined in RFC3121 |
| 4 | sha1 | Binary | 01 | SHA1 hash as defined in RFC3174 |
| 6 | sha256 | Binary | 01 | SHA256 as defined in RFC6234 |

L4-Protocol (Enumerated)

| ID | Name | Description |
|-----|------|-------------------------------------------------|
| 1 | icmp | Internet Control Message Protocol – RFC 792 |
| 6 | tcp | Transmission Control Protocol - RFC 793 |
| 17 | udp | User Datagram Protocol – RFC 768 |
| 132 | sctp | Stream Control Transmission Protocol - RFC 4960 |

Port

| Name | Type | Description |
|------|------|-------------|
| | | |

Port Integer (port) Transport Protocol Port Number, RFC 6335

Query-Item (Enumerated)

| ID | Name | Description |
|----|-------|-------------|
| - | Haine | Description |

1 versions OpenC2 language versions supported by this actuator

2 profiles List of profiles supported by this actuator

3 schema Definition of the command syntax supported by this actuator

4 pairs List of supported actions and applicable targets

Response-Type (Enumerated)

| ID | Name | Description |
|----|------|-------------|
| 0 | none | No response |

1 ack Respond when command received

status Respond with progress toward command completion
 complete Respond when all aspects of command completed

Version

| Name | Type | Description |
|---------|--------|-------------|
| Version | String | TBSL |

Results (Map)

| ID | Name | Type | # | Description |
|------|----------|---------------|----|-----------------------------------------------------|
| 4 | versions | Version | 0n | Supported OpenC2 Language versions |
| 5 | profiles | jadn:Uname | 0n | Supported actuator profiles |
| 6 | schema | jadn:Schema | 01 | Schema supported by this actuator |
| 7 | pairs | ActionTargets | 0n | List of targets applicable to each supported action |
| 1024 | slpf | slpf:Results | 0n | Results from Stateless Packet Filter profile |

ActionTargets (Array)

| ID | Type | # | Description |
|----|------|---|-------------|
|----|------|---|-------------|

1 Action 1 action -- An action supported by this actuator 2 Target.* 1...n targets -- List of targets applicable to this action

slpf:Target (Choice)

| ID | Name | Type | Description |
|----|-------------|--------------|-------------------------------------------------------------------------------|
| 1 | rule_number | slpf:Rule-ID | Uniquely identifies a rule associated with a previously-issued deny or allow. |

slpf:Args (Map)

| ID | Name | Type | # | Description |
|----|--------------|-----------------------|----|------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | drop_process | slpf:Drop- Process | 01 | Specifies how to handle denied packets |
| 2 | running | Boolean | 01 | Normal operation assumes updates are persistent. If TRUE, updates are not persistent in the event of a reboot or restart. Default=FALSE. |
| 3 | direction | slpf:Direction | 01 | Specifies whether to apply rules to incoming or outgoing traffic. If omitted, rules are applied to both. |
| 4 | insert_rule | slpf:Rule-ID | 01 | Specifies the identifier of the rule within a list, typically used in a top-down rule list. |

slpf:Drop-Process (Enumerated)

| ID | Name | Description |
|-----|------|-------------|
| ייו | Name | Description |

none Drop the packet and do not send a notification to the source of the packet.

reject Drop the packet and send an ICMP host unreachable (or equivalent) to the source of the packet.
 false_ack Drop the traffic and send a false acknowledgement that the data was received by the destination.

slpf:Direction (Enumerated)

ID Name Description

1 ingress Apply rules to incoming traffic only 2 egress Apply rule to outbound traffic only

slpf:Rule-ID

Name Type Description

slpf:Rule-ID Integer Immutable identifier assigned when an access rule is created.

slpf:Specifiers (Map)

| ID | Name | Type | # | Description |
|----|-------------|--------|-----|--------------------------------------------------------------------------------------------------------|
| 1 | hostname | String | 01 | RFC 1123 hostname (can be a domain name or IP address) for a particular device with SLPF functionality |
| 2 | named_group | String | 01 | User-defined collection of devices with SLPF functionality |
| 3 | asset_id | String | 01 | Unique identifier for a particular SLPF |
| 4 | asset_tuple | String | 010 | Unique tuple identifier for a particular SLPF consisting of a list of up to 10 strings |

slpf:Results (Map)

ID Name Type # Description
1 rule_number slpf:Rule-ID 0..1 Rule identifier returned from allow or deny command.

jadn:Schema (Record)

IDNameType#Description1metajadn:Meta1Information about this schema module2typesjadn:Type1..nTypes defined in this schema module

jadn:Meta (Map)

| ID | Name | Type | # | Description |
|----|-------------|-----------------|----|------------------------------------|
| 1 | module | jadn:Uname | 1 | Schema unique name/version |
| 2 | patch | String | 01 | Patch version |
| 3 | title | String | 01 | Title |
| 4 | description | String | 01 | Description |
| 5 | imports | jadn:Import | 0n | Imported schema modules |
| 6 | exports | jadn:Identifier | 0n | Data types exported by this module |
| 7 | bounds | jadn:Bounds | 01 | Schema-wide upper bounds |

jadn:Import (Array)

| ID | Type | # | Description | |
|----|------|---|-------------|--|
|----|------|---|-------------|--|

1 jadn:Nsid 1 nsid -- A short local identifier (namespace id) used within this module to refer to the imported module

2 jadn:Uname 1 uname -- Unique name of imported module

jadn:Bounds (Array)

| טו | Type | # | Description |
|----|---------|---|-----------------------------------------------------------------|
| 1 | Integer | 1 | max_msg Maximum serialized message size in octets or characters |
| 2 | Integer | 1 | max_str Maximum string length in characters |
| 3 | Integer | 1 | max_bin Maximum binary length in octets |
| 4 | nteger | 1 | max_fields Maximum number of elements in ArrayOf |

jadn:Type (Array)

| ID | Type | # | Description |
|----|-----------------|----|---------------------------------------------------------------------------|
| 1 | jadn:Identifier | 1 | tname Name of this datatype |
| 2 | jadn:JADN-Type | 1 | btype Base type. Enumerated value derived from list of JADN data types |
| 3 | jadn:Option | 1n | opts Type options |
| 4 | String | 1 | desc Description of this data type |
| 5 | jadn:JADN-Type | 1n | fields List of fields for compound types. Not present for primitive types |

jadn:JADN-Type (Choice)

| ID | Name | Type | Description |
|----|------------|-------------------------|--------------------------------------------|
| 1 | Binary | Null | Octet (binary) string |
| 2 | Boolean | Null | True or False |
| 3 | Integer | Null | Whole number |
| 4 | Number | Null | Real number |
| 5 | Null | Null | Nothing |
| 6 | String | Null | Character (text) string |
| 7 | Array | jadn:FullField | Ordered list of unnamed fields |
| 8 | ArrayOf | Null | Ordered list of fields of a specified type |
| 9 | Choice | jadn:FullFie l d | One of a set of named fields |
| 10 | Enumerated | jadn:EnumField | One of a set of id:name pairs |
| 11 | Мар | jadn:FullField | Unordered set of named fields |
| 12 | Record | jadn:FullField | Ordered list of named fields |

jadn:EnumField (Array)

| ID | Type | # | Description |
|----|---------|---|------------------|
| 1 | Integer | 1 | Item ID |
| 2 | String | 1 | Item name |
| 3 | Strina | 1 | Item description |

jadn:FullField (Array)

| Type | # | Description |
|-----------------|---------------------------------------------------------------|--------------------------------------------------------------|
| Integer | 1 | Field ID or ordinal position |
| jadn:Identifier | 1 | Field name |
| jadn:Identifier | 1 | Field type |
| jadn:Options | 1 | Field options |
| String | 1 | Field description |
| | Integer jadn:Identifier jadn:Identifier jadn:Options | Integer 1 jadn:Identifier 1 jadn:Identifier 1 jadn:Options 1 |

jadn:Identifier

| Name | Type | Description |
|-----------------|--------|------------------------------------------------------------------------------------------------------|
| jadn:Identifier | String | A string starting with an alpha char followed by zero or more alphanumeric / underscore / dash chars |

jadn:Nsid

| Name | Type | Description |
|-----------|--------|-----------------------------------|
| jadn:Nsid | String | Namespace ID - a short identifier |

jadn:Uname

| Name | Type | Description |
|------------|--------|-----------------------------------------------------------------------------------------------|
| jadn:Uname | String | Unique name (e.g., of a schema) – typically a set of Identifiers separated by forward slashes |

jadn:Options

| Name | Type | Description |
|--------------|-------------------------------------|--------------------------------------------------|
| jadn:Options | ArrayOf(jadn:Option) ['min', 'max'] | Options list may be empty but may not be omitted |

jadn:Option

Name Type Description

jadn:Option String Option string: 1st char = option id
